

# Introducing HeliMax™

A High-Accuracy Heliostat System Designed for Ultra-High Concentration

HeliMax features a breakthrough closed-loop control system that consistently delivers high optical performance and saves months of time in calibration over the life of the field.

## Addresses the Three Primary Causes of Error in Heliostats

- Closed-loop control system minimizes tracking errors
- Novel construction improves mirror slope accuracy
- Single-facet heliostat eliminates canting errors

---

HeliMax is available for both electricity generation and process heat projects.
